ABOUT ME

UI/UX Designer with 1 year of professional experience designing user-centred digital products across web and mobile platforms, including B2B applications and internal business tools. Skilled in Figma, user flows, information architecture, wireframing, interactive prototyping, high-fidelity UI design, and design systems. Experienced in translating business requirements into intuitive workflows, responsive interfaces, and scalable design solutions. Collaborates with developers, product teams, and stakeholders to refine designs and support accurate implementation. Also experienced in digital content writing, social media creative design, and AI-assisted design workflows.

EDUCATION

Maharani Arts & Science College, Dharapuram | 2022 – 2025

B.Sc. Information Technology – 9.02 CGPA

Built a strong foundation in software development, UI/UX design, web technologies, and problem-solving. Gained hands-on experience through academic projects and collaborative learning.

TECHNICAL SKILLS

- **Design Tools:** Figma, Figma AI, Stitch AI, Magic Patterns, Uizard, Framer, Midjourney
- **UI Design:** Visual Design, Design Systems, Responsive Design, Material Design, Typography, Color Systems, Iconography, Grid & Spacing, Auto Layout, Components & Variants, Prototyping, Accessibility
- **UX Design:** User-Centered Design, User Research, Problem Definition, Information Architecture, User Flows, Task Flows, Wireframing, Interaction Design, Prototyping, Usability Testing, UX Writing, Accessibility, Design Validation & Iteration
- **Design Process:** User Journey Mapping, Low-Fidelity Wireframes, High-Fidelity UI Design, Interactive Prototyping, Design Handoff
- **Front-End Fundamentals:** HTML, CSS, JavaScript (Basic)

WORK EXPERIENCE

Jr. UI/UX Designer

NRG Phoenix Technology | September 2025 – October 2026

Designed user-centred web and mobile interfaces using Figma, including user flows, wireframes, high-fidelity UI designs, interactive prototypes, and reusable components. Collaborated with developers and stakeholders to translate business requirements into intuitive interfaces and ensure smooth design handoff. Created website content, product-related copy, and user-friendly digital content. Designed social media posts and promotional creatives, maintaining consistent branding through effective typography, colour combinations, and visual hierarchy.

Key Projects

- **Jasper & Cove Mobile App:** Designed an inventory management mobile application for efficient stock management and business operations. Created user flows, wireframes, high-fidelity UI designs, interactive prototypes, and reusable design components while improving inventory tracking, product management, and overall workflow efficiency.
- **PMO (Project Management Office):** Designed dashboards and workflow interfaces for project planning, task management, approvals, and reporting. Improved information hierarchy, simplified complex workflows, and developed responsive UI components to enhance productivity and overall user experience.
- **Job Portal:** Designed an end-to-end recruitment platform for candidates and employers, including authentication, profile management, job search, application tracking, and recruiter dashboards. Focused on improving usability, accessibility, and responsive design while creating a consistent user journey across the platform.
- **SMCC:** Designed user-friendly interfaces for a construction project management application. Created wireframes, high-fidelity UI designs, and interactive prototypes for project tracking, task management, document management, and progress monitoring. Collaborated with developers to deliver a simple, consistent, and intuitive user experience.
